

## Electrical and Engineering for Businesses.

Furst Electrical Services (Furst) specialise in industrial process control for businesses. We offer electrical design, control panel fabrication, installation and automation services designed to empower operators with precise monitoring and control of processes. Our goal is to maximize production and increase the quality, safety and profitability for people producing or handling materials.

Furst's vision is to be the preferred supplier to private enterprises, municipal and other statutory authorities of greenfield and brownfield projects.

Furst aims to actively involve employees, at all levels within the realms of responsibility, in achieving quality and excellence in the company's commitment to meeting its customer needs and expectations.

Our quality focus begins with a complete understanding of customer's objectives and a thorough examination of technical requirements to provide electrical control systems suitable for their intended purpose, in compliance with all relevant standards, specifications and customer expectations. It continues throughout all subsequent processes for timely completion of installation and customer acceptance testing.

Excellence in customer service, design and engineering, on-going staff training and development, providing a safe working environment and seeking and responding to customer feedback ensures long lasting relationships between Furst, its employees and its clients.

The principles of continuous improvement are part of Furst's business approach and an integral part of our quality management system and our quality objectives strive for continual improvement in our systems, processes, products and services.
